

Activities of Little Flower Incubation Centre

Department of Chemistry

Chem Skill -17/06/2019

Aim: Women empowerment

Objectives

- To encourage environment friendly activities among students
- To stimulate the idea of RRR(Reuse, Reduce, Recycle)

Report

Paper bag & Cloth Bag making:

As plastic has become a threat to the environment we the department inculcated the use of paper bag and cloth bag through the incubation centre. These bags are substitute to plastic carry bags and are more eco-friendly. We gave training to our students for making these bags and encouraged them to make it their usual practice of using it. The trained students were taken out to Chavakkad Subjail to train inmates. They also went to Chavakkad Municipality to train the Kudumbasree members of 'Haritha Karma Sena' of Chavakkad Municipality.

Umbrella Making:

'Chemskill' incubation centre of chemistry department gave training for umbrella making to selected candidates. This has provided them the skill of making umbrella and repairing it. This training may be helpful for them in reusing the old umbrella after repairing it.

Cloth Mat:

The waste clothes from the house can be beautifully converted to door mats. Our students made door mats from their unused banyan materials and cotton materials. They trained the Kudumbasree members of Chavakkad Municipality too.

Training to Kudumbasree Members-Haritha Karma Sena (3/10/2019)

Paper Bag & Cloth Bag Making

- **Training to inmates at Subjail ,Chavakkad (26/9/2019)**

Umbrella Making Training(20/9/2019)

- **Door Mat Making training(20/9/2019)**
