

## **SCHOLAR SUPPORT PROGRAMME (SSP)**

The Scholar Support Programme or the SSP caters to students who face difficulty in following the curriculum and provides them support in the form of various study materials, tutorial classes, seminars, lectures and interactive sessions. The colleges that come under this programme identify the students who need additional support through a thorough result analysis that is conducted either at the college level or the University level. Based on the results of the collected data, the students are assigned to different groups where their issues are addressed. The groups are monitored by able tutors and in addition to the help provided by the teachers, the students are also given other study materials and question banks that help them with their problem areas. The students are shown videos that are also a component of the programme. Under this programme, each college is to select a maximum of five subjects and a maximum of fifty students to be a part of the programme and the candidates are chosen from the first semester of the undergraduate programme. The subjects that are to be selected must be chosen from as per the data obtained from the Result Analysis conducted in the college, however one subject that must be identified is the Common Course in English for which ten students must be selected. The programme supervisor is a member of the faculty who will be chosen to over-see the activities and events undertaken by SSP and to ensure a smooth running of the programme. The SSP programme is offered to all the students of the three-year undergraduate programme.
