

Little Flower Incubation Centre

10. Mushroom cultivation Management: Community College 25/03/2019

Aim: To empower individuals through appropriate skill development leading to gainful employment in collaboration with local industry and community

Activities: The mushroom cultivation was started in little flower college, Guruvayoor as a part of one year diploma course horticulture and nursery management of the community college. The inauguration of mushroom establishment was made in the year 2019. After successful completion of mushroom cultivation, we conducted a grand expo and sale of mushroom "SPECTACLE" in the collage portico. The sale of mushroom was done successfully with full cooperation of staff and students in our college. These programmes also created awareness in students about the wide opportunity of mushroom cultivation. After each harvest we continued this process again. The packing and sale made by students neatly and efficiently.
