Anatomical Structure of Animals -CGI

- The detailing of the animals in the movie is done very accurately.It includes the anatomical structure also

A large-scale film set featuring a massive blue water tank. In the foreground, a white wooden boat with a red interior is positioned in the water, with a person inside. Several crew members are visible on the concrete deck surrounding the tank, some operating equipment like a camera on a dolly. The background shows a blue wall and a large white sail-like structure. The text "OCEAN OF THE LIFE OF PIE" is overlaid in the center of the image.

OCEAN OF THE LIFE
OF PIE

Ocean Scene

The scenes at the ocean were huge water tank
High powered equipments were used to create the
waves in ocean

Scene of the Ocean

To make reactions the actors Suraj sharma more real high strength winds and powerful water blasts were made

The tank was so massive

During the time of shooting there were no crew members

Loud horns were used to address the actor whether the scene is going on a retake has been cut

How 'Life of Pi' Became a Visual Masterpiece

ARTIFICIAL TANK SET UP

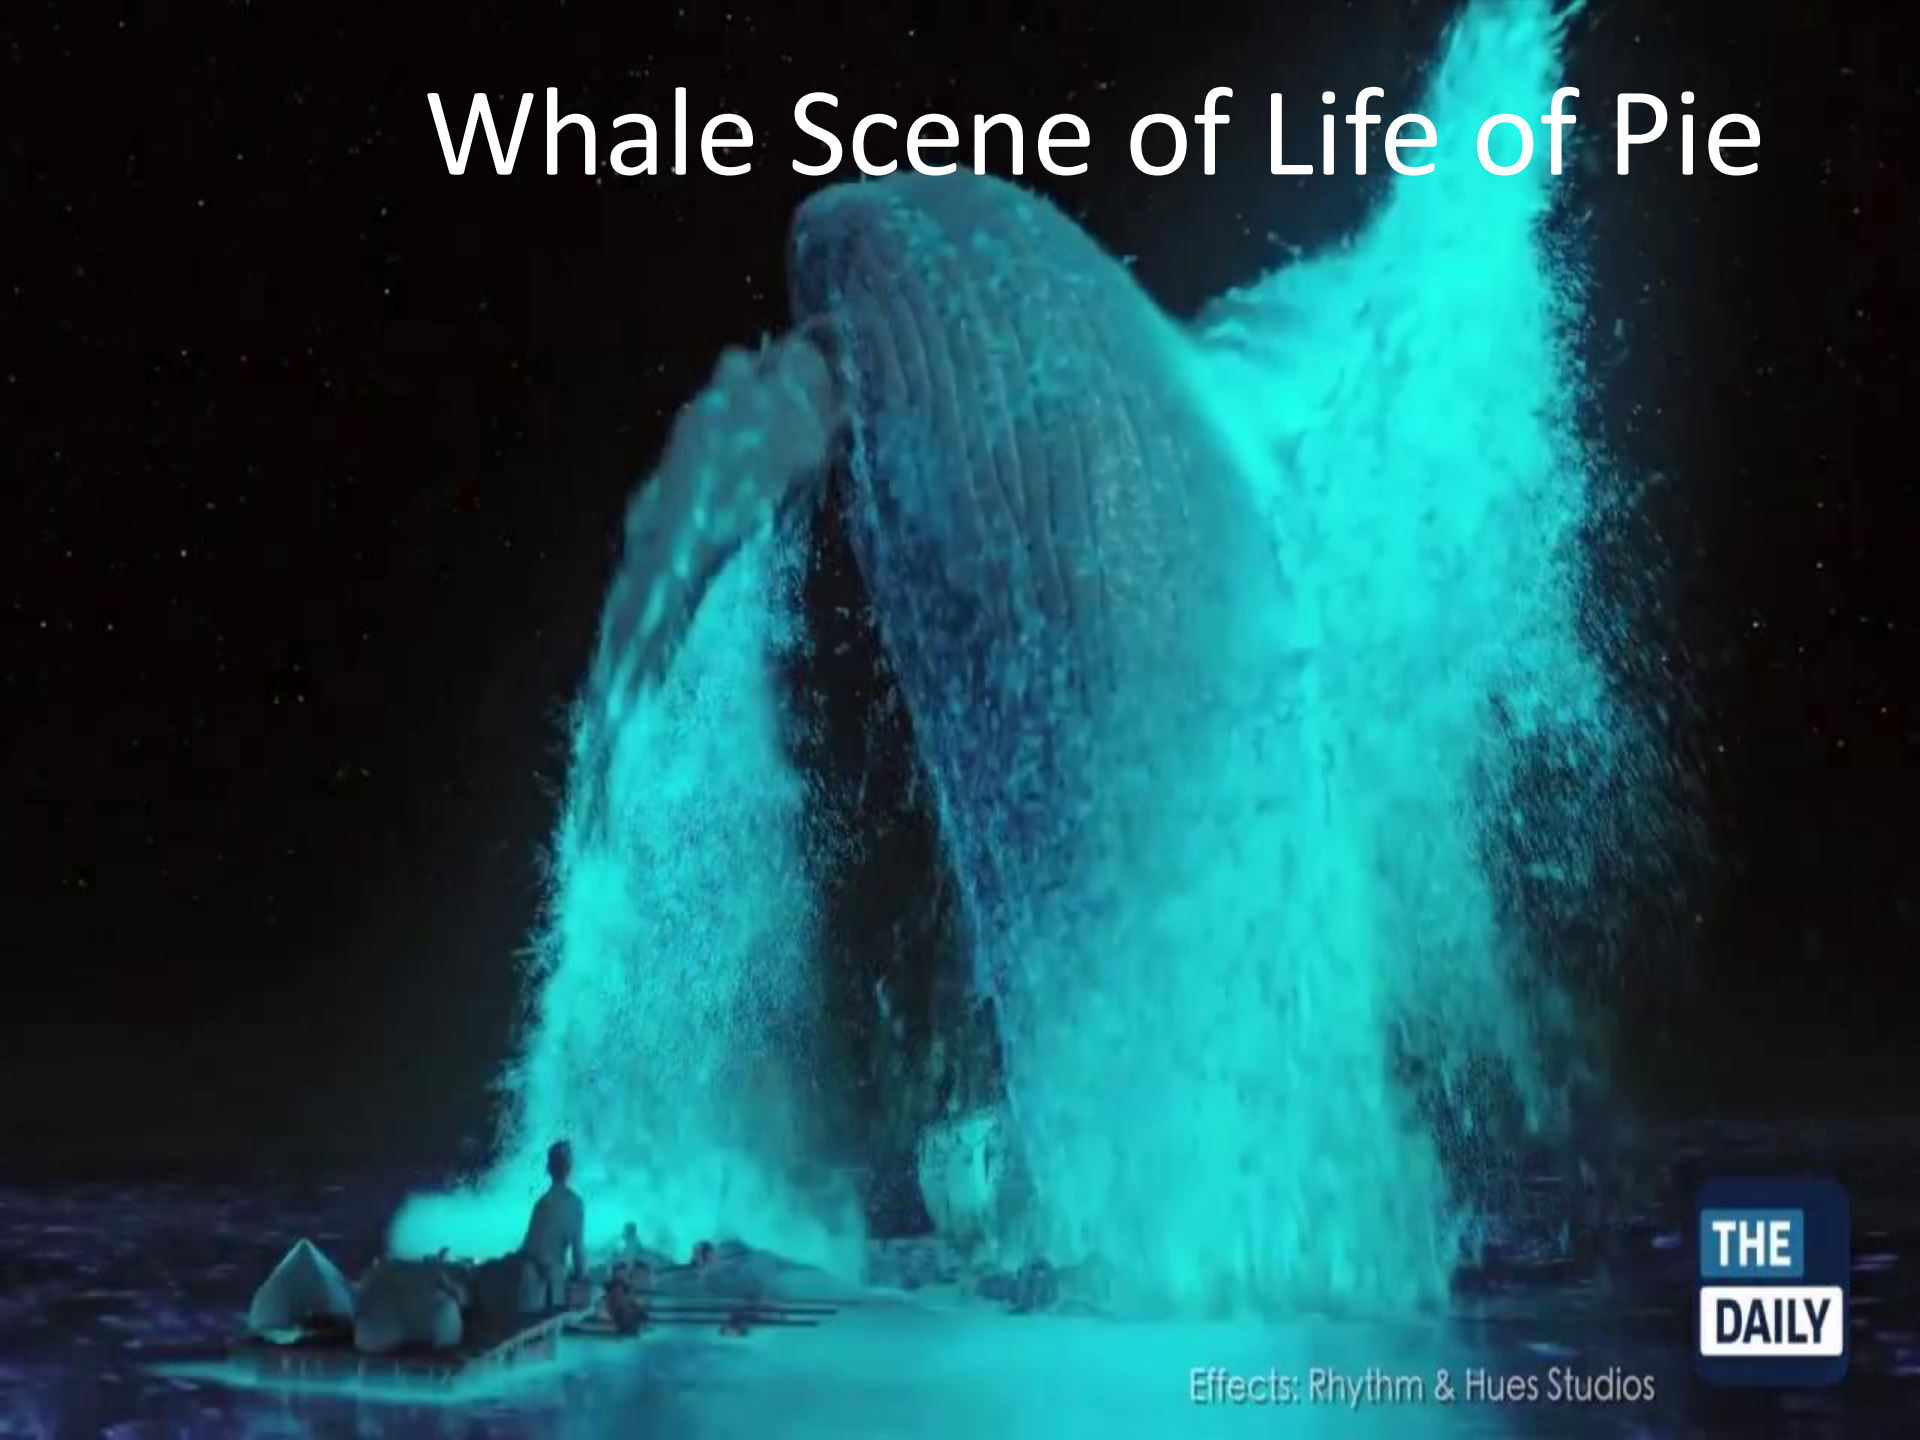

Ocean Scene

- He also had to remember where to walk on the boat as there may be an animal in the shot at the same position
- The most challenging task for the actor was to act by using his imagination of the tiger and other animals

Whale Scene of Life of Pie

The jumping whale aside, this glimmering seawater is something you can actually see in real life, not just a fantasy.

It is created by luminous marine plankton commonly known as the sea sparkle.

An individual cell is just 1-2mm of the size, but abnormal growth of such plankton makes the seawater shine in bright blue. When and where can we see this scenery?
