

# **Activities of Little Flower Incubation Centre**

## **Department of History**

### **Widening the Horizon-28 June 2019**

#### **AIM AND OBJECTIVES:**

- To develop entrepreneurship skills of students
- To create a culture of innovation at campus
- To help students switch their ideas to reality and boost them to the level of commercial value
- To discover value added jobs and services
- To promote new technology/ knowledge/ innovation based start-ups

Central government under the Atal Innovation Mission is setting up incubation centres in both public and private sector. The state government, with the goal of promoting innovation and entrepreneurship, ushered all colleges to enhance the talents of students through skill oriented programmes.

Incubation centre is a platform to nurture, encourage and develop innovation and entrepreneurial skills among students. It provides an opportunity for prospective students to bring out innovative ideas and thoughts which will be incubated and realized and hence, the Incubation centre of the Department of History came up with an idea to inculcate entrepreneurship capacity of our students through skill oriented programmes. In collaboration with World Air Holidays a project, 'Widening the Horizon' was initiated. This project is modelled to make brochure designed by students for World Air Holidays. Another two projects include paper pen making and dream catcher making. All these projects helped the students to develop their skills.
